

Your Source for Hard - to - Find Catalytic Converters

Dealer Alternative Catalytic Converters

2021

Your Source for Hard - to - Find Catalytic Converters

Are you Struggling with Stubborn PO420 & PO430 Codes on High Mileage or Poorly Maintained Vehicles?

Certain makes and model vehicles have very tight perimeters for NOx levels and Oxygen Sensor switching activity. These vehicles can be very hard to keep within threshold when they are in a high mileage condition or have been poorly maintained. Sometimes the carbon and soot levels in these vehicles are hard to clean up, but a Catalytic Converter with a heavier Precious Metal load and Larger Substrate can compensate for the additional NOx being produced.

Today's GDI engine technology increases the chances of carbon and soot issues

Davico Dealer Alternative Catalytic Converters are just that. An alternative to going back to the dealer to compensate for these issues. **Dealer Alternative Catalytic Converters Feature:**

- **O.E.M. Style Wash-Coat Technology**
- **O.E.M. Style Precious Metal Loadings**
- **Larger Substrates for More Surface Area**
- **Greater Oxygen Storage Capabilities.**

Davico Dealer Alternative Catalytic Converters are an easy upsell to your customers, usually costing Distributors a consistent upsell cost over the Exact-Fit option. Passing this upsell on to the Installer gives him a Dealer Alternative to help with these stubborn PO420 & PO430 codes on problem vehicles. Almost any Direct Fit Converter we offer can be made as a Dealer Alternative! Check your cost using your Login ID & Password at: www.davicomfg.com

Davico Dealer Alternative Catalytic Converters eliminate comebacks on high mileage and poorly maintained vehicles. Call Davico Technical Assistance for more details and product availability.

800-422-6046

“Installers who check for Technical Service Bulletins, check or replace Oxygen Sensors and De-Carbonize engines with signs of excess carbon and soot greatly reduce or eliminate comebacks”
