

KNOCK OUT DEPOSITS!

Take a

SLEDGEHAMMER!

to P0420 Codes!

Sledgehammer Fuel System Ultra Treatment is suggested for use with each oil change or every 3,000 miles. It can help:

IMPROVE FUEL ECONOMY

REDUCE EMISSIONS

RESTORE LOST ENGINE POWER

IMPROVE ACCELERATION

Davico Manufacturing recommends decarbonizing all vehicles over 80,000 miles or when making a Catalytic Converter Replacement. For more details contact Davico Sales & Technical Services:

Part # 1540EA

2-Step Induction Kit

A professional solution for Carbon & Soot related Catalyst Efficiency Issues.

****Add SLEDGEHAMMER Fuel Treatment to a FULL tank of fuel before using the induction cleaner.***

****Engine should be at operating temperature. Remove cap from can. Remove tapered nozzle tool from cap and connect to top of can. Start engine and disconnect a vacuum line (PVC, Brake Booster, Canister Purge etc.) Choose a vacuum line as close to the intake as possible. Insert tapered cone into vacuum line. Spray product into the vacuum source in short bursts. Operate the throttle while spraying to prevent stalling. Take your time (8-10) minutes and use the entire contents of the can. When can is empty reconnect the vacuum hose. Raise RPM's repeatedly to purge any remaining cleaner. For best results immediately test drive the vehicle at various speeds and loads to help remove softened deposits from the system. For additional cleaning use Premium or Top Tier Fuel for the next few refuels and at least once per month going forward.***
