

Your Source for Hard - to - Find Catalytic Converters

Medium Duty Truck Catalytic Converter Program 2023

Your Source for Hard - to - Find Catalytic Converters

Davico Medium Duty Catalytic Converter Program

Medium duty Catalytic Converters are over-engineered keeping the demands of medium duty work trucks in mind. Typically these trucks are exposed to long idle times, high heat conditions and heavy pay loads. In all cases these Converters are either Y-Pipe Converter assemblies often available as split two piece parts, or large underbody Converters located under the truck body or chassis.

Davico Medium Duty Converters Consist of High Quality:

- ***Direct Fit Y-Pipe Converters w/ Heavy Catalyst Loads***
 - ***Direct Fit & Universal Underbody Converters***
- ***4", 5" and 6" Heavy Load Converter Bodies Including***
 - ***Ford Torpedo Style Converters***
- ***Modern wash coat technologies. O.E.M. Fit & Finish***

- ***Largest Offering of Truck Converters in the Industry !***

Your Source for Hard - to - Find Catalytic Converters

Medium Duty Truck Catalytic Converters are often subject to high theft replacements on box trucks, fleet and rental trucks. We can prototype any application !

Because production and sales forecasting is often difficult if not impossible on these applications large quantities of these part numbers often need extended lead times. Please discuss your needs with us as soon as they present themselves.

- ***All Davico Medium Duty Truck Converters are shipped with new gaskets where needed.***
- ***RTV sealers should NEVER be used on Catalytic Converter gaskets or connections.***
 - ***Upstream and downstream Oxygen Sensors MUST be checked or replaced.***
 - ***Engines with more than 80,000 miles should be decarbonized.***

“Installers who check for Technical Service Bulletins, check or replace Oxygen Sensors and De-Carbonize engines with signs of excess carbon and soot greatly reduce or eliminate comebacks”
